Directed Technologies Drilling is seeking general laborers/equipment operators for work on Oil and Gas pipeline installation projects.

Applicants should expect 12-16 hour work days and extended work weeks and night shifts. Projects are typically located in rural areas with limited services. Applicants should be prepared to work in all weather conditions (extremes of hot and cold and also rain and snow).

Preferred Experience and Credentials:
- Heavy Equipment Operator Certification
- Valid CDL Class A
- Welding experience
- Mechanic (diesel and gas engines)

Work tasks may include:
- Operating motor vehicles and heavy equipment (primarily excavator, forklift, or backhoe)
- Lifting bags of drilling fluid additives, up to 50 lbs.
- Moving drill pipe or well casing, by hand or with the use of hoisting equipment
- Moving and operating small, cart-mounted, engine-powered equipment (pumps, etc.)
- Fueling field and shop equipment
- Use of hand tools for equipment maintenance, repair, or fabrication
- Hand excavation of small pits or trenches in soil
- Use of welding equipment for equipment repair or fabrication
- Light carpentry

Skills and requirements necessary for the performance of these duties include:
- Good eyesight (correctable if necessary)
- Excellent balance and coordination
- Ability to work well with employees with diverse backgrounds

Compensation: Rate of pay will be based on experience and credentials. Lodging and per diem are provided for projects located outside of the Centre County region.
