

COLLISION REPAIR TECHNOLOGY

INSTRUCTOR BIOGRAPHY

Mr. Brian Hummel

Mr. Hummel was born and raised in Mifflin County, PA. He graduated from Chief Logan High School and Mifflin-Juniata Area Vocation-Technical School in Collision Repair. He has over 35 years experience in the autobody field, spending the last 25 years as a manager at two different dealerships. While employed at these two dealerships, his shops led the General Motors 20 Groups in Auto-Body/Collision Repair. Brian is an ASE Master-Certified Technician and I-CAR Gold Standard certified. He also has a current Pennsylvania Motor Vehicle Physical Damage Appraisal license.

Over the course of these 25 years as a manager, it became difficult to hire quality-trained technicians in the field. So, he chose to leave his management position to train students to be future employees. Brian joined the staff at CPI in the fall of 2014.

A Quote from Mr. Hummel

“Working at CPI has made me realize how much I truly enjoy doing collision repair/body work. Watching the students progress with what I am teaching is undoubtedly the greatest reward I have been given.”

FUN FACTS ABOUT MR. HUMMEL

When Mr. Hummel was a junior in high school, he and a buddy received a reward and commendation from the Fraternal Order of Police for catching an armed bank robber.

Mr. Hummel enjoys fastpitch softball. While coaching, his teams made it to the ASA girls state title game twice; placing second as a head coach and first as an assistant coach.

Mr. Hummel truly enjoys kids and athletics. He has coached biddy basketball, youth soccer, elementary wrestling, little league baseball and softball, ASA softball, and for his 50th birthday completed the Hardcore Mudd Run at Tussey Mountain.

COLLISION REPAIR TECHNOLOGY

Outside Classroom Work:

Our shop is full of many projects. These projects may be completed individually or in groups, depending on the project. When work arrives in our shop, students will first prepare by writing a computerized estimates meeting current insurance standard qualifications. All projects are focused around minor to major collision repairs, from the most minor door dings to major frame repair and sectioning. Repairs must meet insurance standards and quality. The shop is organized based on Mr. Hummel's 35 years experience as a manager at two reputable and very profitable body shops.

- Good Attitude
- Attention to detail
- Willing to pride in the finished results
- Priorities and Goals
